

Kervin/Hall/Coyote Hills Production Sale

2008 Supplemental Information

Revised 5/2/08 1:20 pm

Note: All females were preg-checked by Dr. L.D. Barker previous to cataloging with the use of ultrasound technology. The word "safe" is printed after the appropriate exposure to the best of our knowledge and ability. Weaning weights were taken 4/23/08 and the adjusted 205-day weights are listed on the supplement sheet (AWW). The calves that are broke to "tie" are also listed.
