She was a little greener for picture time but she is coming on strong. Dont over look her on sale day! She won't disappoint as she is long as a freight train and very pretty fronted!

Georgia is a direct daughter out of the great Executive Order who doesn't need any introductions. This PB is going to be a little bigger framed than most EO calves with her dam going back to Legacy. She has the capacity and agility of a great one and is getting better every day. Her dam has never missed when A.I.ing and has produced many nice herd bulls that have sold through our Hawkeye Bull Sale. This is her first daughter that I have offered for sale and its very hard to see one like this go. Don't miss out on this great purebred. Use her anyway you want and you won't go wrong!

This Carver daughter is one that continues to impress us each day, and for good reason. Talk about power in the blood! She is out of a beautiful female we purchased as a bred out of the Jewels of the Northland Sale. Her dam stems back to the Antoinettes Joy female (who needs no introduction) that hasn't missed yet producing solid females and bulls that go out and excel - GY33 will be no different.

Redhead alert and a good one at that! Gretta is flawless in her design. She is whistle fronted, level topped, moves out like a cat, big middled and great haired. I have admired this girl since day one and she just keeps getting better with each passing day. An outcast on her pedigree, back from a Milestone daughter that came from the great Decap family and back to a bull that we raised. Don't pass this heifer up on sale day. I really think she will be a super fun one to watch in the ring. Great disposition!

This P2B daughter always caught my attention in the pasture as a sound structured good doing heifer. Then I got her weaned and started working with her and clipped out. It then hit me she just might have all the parts it takes. Sound structure, depth of rib, square hip and that blaze face doesn't hurt any

either. Check out the extended clean neck this one comes with. Grandam and dam are both excellent cows. If you like the idea of buying a heifer that will produce after her show career is over, take a look here.

This is one of the first County O heifers to sell and we are kind of excited about her. Her mother was the high seller at the North American Sale a few years ago and is a direct daughter of the famous 8543U cow that is truly a breed matriarch. I saw County O in Griswold's pen in Denver and was excited about what this mating was going to be and they are better than I imagined.

Feminine fronted, sound, flat, swoop bellied and great from the profile. She's the kind judges hunt for on show day. You can see why the Relentless cattle are so HOT right now. Her dam raised a \$5,300 bull a couple year's back. I had a hard time convincing my daughters into selling this one, but I committed to the Hawkeye group we would bring some of our best from the keeper pen. So enjoy, she'll turn out just fine.

We have always found this heifer really intriguing. She is long fronted and big middled. Her dam is a young cow who is really starting to prove herself as a reliable producing cow that is going to do great things. Don't overlook this heifer as she is younger. but way cool in her build and show ring look! Awesome neck which ties into an enormous rib cage. Ideal angle to her shoulder and flexible in her hock and pasterns. Weaned 8 days before this picture and video. She will change alot for the better come November 3rd. Check her out sale day.

JM Steel My Heart
Dam of Lot 41

This heifer is a result of an embryo package I bought from Sloup Simmentals out of their powerhouse donor Steel My Heart (full sib to HOC Broker). She is sired by the female maker legend himself Silverias Style 9303. This is a heifer I probably shouldn't be selling but I wanted to bring my best to this sale!

Folks this one is massive, big footed, stout hipped, chubby middle show steer. If you like them stout, sound and cool from the side, he's your guy.

WOW! What do we have here? He caught your attention and will demand a second look from every judge as well. He's really cool. Whistle fronted but still has that tremendous soft rib cage design and easy feeding look. Super sound and flexible off both ends. This guy was designed to stand in the cooler 100 days then pull him out and flex & stride out like he's been on grass all summer. Here's one that will hunt with the crossbreds.
