

23rd Annual **K**appes Simmental

“Genetics with the Holistic Approach” Sale
Saturday, February 20, 2010 • 11:59 AM
Aberdeen Livestock (West Barn) • Aberdeen, South Dakota

*Selling Simmental,
SimAngus and Angus Genetics!*

121 Performance Tested Bulls • 28 Elite Bred Heifers

Welcome to the 23rd Annual
Kappes Simmental
 "Genetics with the Holistic Approach" Sale!
 Cattleman,

I wanted to briefly cover our testing for Arthrogryposis Multiplex (AM) and Neuropathic Hydrocephalus (NH). Progressive cattlemen have inquired about our testing policy for these known genetic defects. We will have tested all animals identified as potential carriers or risk of being potential carriers within our cowherd by sale day. All animals that tested positive for AM or NH will be eliminated from the sale lineup, which in our case is less than one percent of the 2008 and 2009 born calves.

The tools of the cattle business have changed drastically throughout the history of the cattle industry. Many years ago scales were utilized and still are today to evaluate calves at birth, weaning and yearling. Then in the 90's, ultrasound technology began to evolve to assess carcass potential. Today, we able to utilize DNA technology to test for several traits.

We were selected as one of four breeders to represent the Simmental breed in the United States for the National Beef Cattle Evaluation Consortium's weight trait project. Here is the verbiage we were provided with on the study:

"The weight trait project is designed to study and address issues associated with the integration of DNA technology tools for selection into beef cattle breeding programs using early growth traits as a model. This project is a joint research effort of the National Beef Cattle Evaluation Consortium (NBCEC), US Meat Animal Research Center (MARC), seven breed associations, four universities in the Northern Plains region and one DNA company, Igenity. The seven breed associations are Angus, Charolais, Gelbvieh, Hereford, Limousin, Red Angus and Simmental. These seven breeds are represented in the Cycle Seven Project at US MARC. The four Northern Plains universities are Kansas State, South and North Dakota State Universities, and the University of Nebraska at Lincoln."

Twenty-one seed stock producers representing the seven breeds from the Northern Plain states are collecting DNA samples on their 2008 fall born and/or 2009 spring born calves and their dams for this project. A total of approximately 9,000 calves and an equal number of dams will be collected. DNA markers developed from phenotypic information on calves at US MARC will be used to develop a DNA test panel that will be applied to the DNA samples of the male calves from these herds. The objective is to test the efficacy of DNA testing across breeds and management systems. The genetic prediction from the DNA test will be compared to the calves' actual phenotypic performance and EPDs for birth, weaning and yearling weights. This project will also look at methods of incorporating DNA information into the calculation of EPDs."

As part of this project, we were able to select 10% of our Purebred Simmental bull calves to be tested using the Igenity Profile. These were selected in early October. They represent a cross section of the Purebred Simmental bull calves. This is designed to help us understand and manage the potential for animals to perform and transmit traits of economic importance. This technology is in its infancy and where it will head is yet to be seen.

We, at Kappes Simmentals, have always been willing to sample new technology and will continue to utilize the tools to advance our breeding program genetically to deliver the genetics for your seed stock or commercial program with economic sustainability.

 Log onto their website <http://us.igenity.com> or call (877) 443-6489.

BIRTH, WEANING & YEARLING RATIOS

The American Simmental Association (ASA) & American Angus Association (AAA) use the same means to determine growth ratios for weaning and yearling, but different for birth.

	Herd Avg	Actual	ASA Ratio	AAA Ratio
BW	85	94	90	110
WW	700	770	110	110
YW	1200	1320	110	110

Keep in mind when comparing data on the Simmental and Angus calves that the birth ratios are different between breeds. The SimAngus cattle are all calculated and registered with the ASA. The birth and weaning ratios compare all male calves born, but the yearling ratio for the bulls are only compared with the males kept as bulls.

TERMS AND CONDITIONS: 1) All cattle will sell under the Suggested Sale Terms & Conditions of the American Simmental Association and the American Angus Association. These terms and conditions will be available sale day. 2) We guarantee our cattle to be breeders but reserve the right to test any animal that may be returned to us as a non-breeder for one hundred eighty (180) days before making an adjustment. Cattle will be returned at the buyer's expense, and if declared a sound breeder by a competent veterinarian, the cattle will be returned to the buyer's ranch at the buyer's expense. In case an adjustment is required it will be made with a replacement of equal value to the animal in question or credit on the purchase of another animal. 3) Any death or injury after the animal is sold is at the buyer's risk.

AIR TRANSPORTATION: Aberdeen Regional Airport is serviced by Northwest Airlines, 800-225-2525. Rental cars are available through Avis at 605-225-9153 or Hertz 605-225-4163. Rental offices located at airport terminal.

LIVESTOCK INSURANCE: Insurance available sale day through sale management.

ANNOUNCEMENTS: Announcements made sale day and from the auction block take precedence over printed material in the catalog or other printed material associated with this sale. Anyone attending this sale attends at his or her own risk. Kappes Simmentals, Eberspacher ENT. or any other sale force will not be held responsible for any personal injury for attending this sale.

EPDS: Please note that EPDs may change from the time the sale catalog is printed until registration paper is transferred. EPDs listed are the new Spring 2010 numbers.

TRUCKING: BULLS: Haul your bulls home sale day and receive a \$30 per head discount!

Sadie M166 has set the performance bar in our cowherd. She consistently has some of the highest performing embryo transplant calves. Her sons have topped several of our production sales. Sadie is homozygous polled. This year we added a new segment to the offering of Sadie sons sired by the Angus carcass king - G A R Predestined, and Simmental sires GW Lucky Man and Triple C Invasion. All three of these sires are homozygous black and homozygous polled.

GEORGINA
THE PERFORMANCE
DONOR OF OUR
ANGUS LINEUP

AAA EPDs: CED +3 BW +2.6 WW +42 YW +78 CEM +9 Milk +23 \$EN +2.09
Carcass: CW +18 Marb +.32 RE +.17 Fat +.014
Values: \$W +24.19 \$F +20.49 \$G +21.43 \$B +44.96

J K Miss Georgina 088 consistently produces the sale-toppers in the Angus division. She leads our Angus ET donor program by delivering sons that will push the scale down. She has posted the following ratios on as many as seven natural calves: BW 97, WW 110, YW 106, % IMF 113 and REA 108.

Kappes GAR Predestined W624

Purebred Angus Bull AAA#16490101
BD: 3-6-09 Tattoo: W624

W624 combines power, phenotype, maternal and paternal pedigree breed leaders. His muscle pattern is dense with a thick top and awesome lower quarter. He is clean fronted with a boat-load of rib capacity and has depth in both his fore and rear flanks. He is definitely seedstock material.

U431 is a moderate framed, high volumed brood cow prospect. She moves out with base width, length of stride and lots of flow ability. She has the making of being a donor cow. She carries the service of new genetics to our program. Watch our website for updated homozygous black and homozygous polled results.

Bull Buyer's Quick Guide to ASA EPDs and \$ Indexes

Definition of Terms

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels.

- Back Fat (BF): Inches of backfat.
- Birth Weight (BW): Pounds of birth weight.
- Calving Ease (CE): Percent of unassisted births when used on heifers.
- Carcass Weight (CW): Pounds of carcass weight.
- Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.
- Milk (MLK): Pounds of weaning weight due to milk.
- Marbling (MRB): Marbling score.
- Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.
- Ribeye Area (REA): Square inches of ribeye.
- Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.
- Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario.
- Weaning Weight (WW): Pounds of weaning weight.
- Yearling Weight (YW): Pounds of yearling weight.
- Yield Grade (YG): Yield grade score.

Explanation of How to Utilize API and TI Indexes

First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a \$50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed.
