Selling 119 Simmental, Angus & SimAngus™ Herd Bull Prospects • Red & Black

Performance Cattle with a Touch of Style.

Welcome to our 44th Annual Production Sale!

SELLING 119 PERFORMANCE
TESTED BULLS
49 years in the business!
"Quality is bred on...not fed on."

Darrin Minge, Livestock Specialist • 785-747-7422

Once again, we would like to welcome you to the 44th Annual Production Sale. We appreciate your interest in LHT brand cattle and would like to thank you for your support of our program. Without you, there would be no program!

Our slogan, "Quality is bred on, not fed on" is a testament to our beliefs in bull development. Our bulls are fed in a way to show their genetic merit. They are not fed a high concentrated corn feed. They are fed ground hay, rye, corn silage, wet distillers, and 7-8# a day ground corn. They are fed together as spring or fall bulls. They run over a 20 acre lot. These bulls will stay hard and won't fall apart once brought home and turned out with cows. This will also keep them sound and ensures that they will be able to cover a lot of cows. Additionally, we are adding to the longevity of the bull. We feel strongly that big contemporary groups help separate the men from the boys! These, my friends, are performance bulls for you to take home and make them work for you.

Old or new customers alike, we would like to extend a big, heartfelt welcome to our 44th Annual Production Sale! We feel very confident that our program is headed in the right direction. We continue to scour the country, checking out genetics to make sure that we are on the cutting edge. We go to great lengths to ensure that we have our customers' best interests in mind when it comes to what we are trying to produce.

As always, we offer a sight unseen program and will guarantee every purchase is exactly as stated to you or your money back. We will have complete performance data, ultrasound data, and breeding exam data available for you the week of the sale. We pride ourselves on being very service-oriented and would be more than happy to assist you with marketing your calves and LHT Brand slaughter bulls. We continue to get calls back from several of the first LHT sired heifers – people just can't believe the quality of cows they are making and they want more! Please don't hesitate to call us if we can help you market your calves, as there is a demand for them.

Darrin Minge continues to work as our LHT Brand Livestock Specialist. He is truly committed to our program and continues to be a huge asset to our operation. He has steadily improved our conception rates through his dedication to heat detection and proper nutrition programs. Additionally, he continues to look for ways to improve efficiency by having the whole cow herd calve much tighter and get more Al calves every year. Feel free to contact Darrin, in addition to Scott and Loren, as he knows the cattle as well as anybody. He is also a great person to talk to if you would like some ideas on trying to improve the reproduction in your herds.

We at Trauernicht Simmentals owe a special tribute to all the friends and neighbors who help make our annual production sale possible. Without you, we wouldn't be able to make this sale happen! Thanks for all the countless hours and the behind the scenes work that each and every one of you do. Since some of you have never seen a sale from the front, you wouldn't know that it looks like I have a professional crew! We are truly blessed – you are the best crew!

Last, but certainly not least, we want to thank you, our loyal customer. With your overwhelming acceptance of our Simmental and SimAngus bulls we are able to have remarkable success in raising seed stock! Never have our bulls been in such demand, and consistently to sell out early year after year! Your success stories have brought us great joy and continue to motivate us to continue on! You are truly appreciated.

Sincerest Thanks! LT & Scott

Trauernicht Simmentals ODUCTION SALE 20

44th Annual Sale held on Sunday, February 17th at 12:00 Noon Sharp! Sale Location: Beatrice 77 Livestock, Beatrice, Nebraska

SALE SCHEDULE

Anytime Prior to Sale Dates......Cattle Viewing at the farm Fri.-Sat., February 15-16th Viewing of Sale Cattle at Beatrice 77 Livestock Sunday, February 17th 11:00 AM......Complimentary Lunch 12:00 Noon Sharp. 44th Annual Trauernicht Simmentals Production Sale

What a flush! I can't remember a flush that created this much excitement! We are excited about the uniformity of these bulls. They are huge topped and big assed, good boned, big bellied, and structurally correct. We are truly excited to offer you this set. So excited, in fact, that we will be using these genetics back in our herd. Not only are they impressive to the eye, but check out these boys' numbers! They are hard to put a hole in. Everyone that has walked our pastures have asked about them! Let these guys put you at the top of the charts. 14 EPDs in the top 20% of the breed with growth and TI in the top 1%. Wow!

Lot 1: Selling ½ Interest, call Scott for details.

We have continued to use Top Ten, as they have been some extremely functional cattle that really work well. They are light birth weight, fast growing, and excellent udder females with way above average phenotype. Top 10% of the breed for weaning weight and top 15% yearling weight. If you haven't tried a Top Ten son, I would be sure to consider taking this one home.

This bull has had two older full sibs...since this mating worked so well, we wanted to do it again! He is a very high maternal bred bull with adequate growth and plenty of calving ease. You will understand why this mating has always been a crowd favorite when you see him.

We really like this bull. He stands out in so many ways. We are not the only ones that thought so, as he was Reserve Calf Champion at the Nebraska State Fair. He is super good in his front third, has a huge middle, is huge hipped, and he ties it all together with a superb structure. He continues to get better with time. To really set him apart, he has excellent scan data and good EPDs.

Mr. TR Hammer 308A ET **ACLL Fortune 393D** Firefly 311A W/C BF Innocent Man BF Miss Im Bonnie C90 Miss CCF Sheza Bonnie Y61

If you want one to go home and sire a bunch of show cattle, this bull is the one. He is big ribbed, stout made, and extremely fluid in his movement! This is a bull to put your program on the map and sell a bunch of high dollar heifers or steers. Extreme high quality bull here.

On our quest to look for some top end outcross red genetics, we stumbled across this bull's mother at Werning's in South Dakota. We decided we needed to add her genetics to our herd. This bull is the result and we sure are pleased! He has done everything we had hoped for and then some. Calving ease with above average for growth...Use him to add a punch to your calves!

Bull Buyers Guide

Explanation of How to Utilize API and TI Indexes

First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described to the left, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6.000 over a \$50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For more information, visit www.simmental.org.

Definitions of Terms

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels.

Back Fat (BF): Inches of backfat.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters. Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Marbling score. Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak. Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Yield grade score.

BID ONLINE AT Live Auctions W

For more information, call Support Team 800-431-4452

What is a bull worth?

COWMAN FORMULA

Increase in pounds per calf from a top perfomance bull

- X Number of cows bred to him per year
- X Number of years to keep the bull
- X Expected selling price of calves
- = Additional dollars you can pay for a better bull

Example...

A bull who will add 30 pounds to the weaning weight of each of his calves mated to 25 cows per year for 4 years and you sell the calves for \$1.50 per pound:

 $30 \times 25 = 750 \times 4 = 3000 \times 1.50 = $4,500$

This bull is worth \$4,500 more than the average bull who will keep your weaning weights the same. Take this formula and put your own figures in and see what you can afford to pay. This equation does not consider the increase in value due to calving ease, higher quality replacement heifers, yearling growth, feedlot gain and improved carcass quality.
